Nikolay Nikolov

Research Interests

Deep Reinforcement Learning, Robotics, Deep Learning, Computer Vision

Education

2014–2018 **Imperial College London**, *MEng Electronic and Information Engineering*.
First Class Honors *72.4%*; GPA equivalent: *4.0*
Courses: *Robotics* • *Machine Learning* • *Computer Vision* • *Control* • *Operating Systems* • *Compilers* • *OOP* • *Mathematics* • *Networks* • *Databases* • *Algorithms and Data Structures*

2017–2018 **ETH Zurich**, *MEng Exchange Student*.
Courses: *Deep Learning* • *Probabilistic Artificial Intelligence* • *Dynamic Programming and Optimal Control* • *Machine Learning* • *Vision Algorithms for Mobile Robots*

Experience and Research

Sep 2017 –Present **Learning & Adaptive Systems Group**, *Research Assistant*, ETH Zurich.
Distributional perspective on Reinforcement Learning
- Supervisor: *Prof. Andreas Krause*

July 2017 –Sep 2017 **Ocado Technology**, *Robotics Research Intern*, Hatfield, UK.
Deep Reinforcement Learning for robot picking
- Implemented a Deep Reinforcement Learning algorithm for picking objects from a basket using a camera
- Based on the visual servoing approach in *Learning Hand-Eye Coordination for Robotic Grasping with Deep Learning and Large-Scale Data Collection, Levine et al.*
- Implemented in TensorFlow and deployed on a UR10 robotic arm

Jan 2017 –Sep 2017 **Dyson Robotics Lab**, *Research Assistant*, Imperial College London.
Bayesian Fusion for Volumetric SLAM based on Occupancy Mapping
- Supervisor: *Prof. Stefan Leutenegger*
- Developed Bayesian formulation for volumetric occupancy fusion from depth camera
- Prototyped real-time implementation for a CPU or a CUDA-enabled GPU
- Demo: http://nikonikolov.com/projects/bfusion
- Paper submission to IEEE RA-Letters and ICRA 2018

June 2015 –Jan 2017 **Aerial Robotics Lab**, *Research Assistant*, Imperial College London.
Built a Bio-inspired Bimodal Walking Hexapod Quadcopter with actuators that allow both walking and flying
- Supervisor: *Prof. Mirko Kovac*
- Demo: http://nikonikolov.com/projects/wkquad

Publications

in review **Efficient Octree-Based Volumetric SLAM Supporting Signed-Distance and Occupancy Mapping.** *Emanuele Vespa, Nikolay Nikolov, Marius Grimm, Luigi Nardi, Paul H J Kelly, Stefan Leutenegger.* Robotics and Automation (ICRA), 2018 IEEE International Conference on, 2018.

Selected Projects

2017 **Third Year Group Project**, *Imperial College London*.
Baxter robot that autonomously delivers snacks indoors
- Supervisor: *Prof. Petar Kormushev* (Robot Intelligence Lab)
- Built ROS-based algorithm for localization, path-planning and obstacle avoidance
- Demo: http://nikonikolov.com/projects/asda

2017 **Drone Delivery System**, *Brown Univeristy*, Providence, RI, US.
Raspberry Pi-operated DJI M-100 to deliver food in Brown University
- Demo: http://nikonikolov.com/projects/dronedelivery

2017 **Eurobot 2017 Robotics Competition**, *Imperial College London*.
- Built a robot to recognize, collect and move objects in order to build a lunar base
- Work involved ROS, Embedded Systems, Localization, State Estimation

2017 **Machine Learning for Movie Recommendation**.
Collaborative Filtering system for movie recommendation

2016 **HackZurich**, *Zurich, Switzerland*.
Image-processing and Optical Character Recognition (OCR) app that can scan grocery receipts to keep track of fridge contents. Implemented using OpenCV and Google OCR API

2016 **Autonomous Raspberry Pi Robotic Car**.
Autonomous car that uses Monte-Carlo localization to optimally navigate and recognize obstacles

2016 **End-to-end C90 to MIPS compiler**.
Self-hosted C90 compiler implemented in C++, flex and bison

2015 **Eye tracking on FPGA**.
Real-time image-processing FPGA architecture that tracks human eye movements

Skills

Programming	C/C++ • Python • Java • Shell • MATLAB • JavaScript • HTML/CSS • SQL
Software	TensorFlow • ROS • OpenCV • CUDA • scikit-learn • git • Linux • GNU • LaTeX
Research	Deep Reinforcement Learning • Robotics • Deep Learning • SLAM • Vision
Languages	English • Bulgarian • Russian

Honors and Awards

2015	Jessel Rosen Research Award	*London, UK*
2013	International Young Physicists Tournament - Bronze Medal	*Taipei, Taiwan*
2013	STEM distinction by the President of Bulgaria	*Sofia, Bulgaria*

Online Courses

Deep Reinforcement Learning, *Sergey Levine, UC Berkeley*.
Convolutional Neural Networks for Visual Recognition, *Andrej Karpathy, Stanford*.
Machine Learning, *Andrew Ng, Stanford*.

Affiliations

2014–Present	Imperial College Robotics Society Member
2007–Present	Aikido - 1st Dan Black Belt
2015–2016	Imperial Entrepreneurs - Vice President
