NIKOLAY NIKOLOV

nikolay.nikolov14@ic.ac.uk | +44 7518 268 975 | nikonikolov | nikobnikolov | nikonikolov.com

EDUCATION

IMPERIAL COLLEGE LONDON
MEng Electronic and Information Engineering
2014-2018 | London, UK
First Class Honors 72.4%
GPA equivalent: 3.8 - 4.0

MODULES INCLUDE:
Computer Vision • Robotics
Machine Learning
Control Systems
Embedded Systems
Signal Processing
Operating Systems
Compilers • OOP
Networks • Databases
Algorithms and Data Structures
Communication Systems

ONLINE COURSES:
Robotics - UPenn
Machine Learning - Stanford
Reinforcement Learning - Imperial
Concurrent Programming - MIT

SKILLS

PROGRAMMING
Expert: C/C++ • Python
Intermediate: Java • Shell • SQL
MATLAB • JavaScript • HTML/CSS

SOFTWARE
Linux • ROS • OpenCV • CUDA
TensorFlow • git • make

HARDWARE
mbed • Raspberry Pi
FPGA • Pixhawk • Arduino

ROBOTICS
Vision • Deep Learning
SLAM • Probabilistic Robotics

LANGUAGES
English • Bulgarian • Russian

AWARDS

Jessel Rosen Research Award
2015 | London, UK

International Young Physicists Tournament - Bronze Medal
2013 | Taipei, Taiwan

STEM distinction by the President of Bulgaria
2013 | Sofia, Bulgaria

ENGINEERING EXPERIENCE

OCADO TECHNOLOGY | Robotics Research Intern
July 2017 - Sep 2017 | Hatfield, UK
Deep Learning for robotic perception and manipulation

DYSON ROBOTICS LAB | Undergraduate Research Assistant
Jan 2017 - Present | Imperial College London
Bayesian Fusion for SLAM
- Working under the supervision of Dr Stefan Leutenegger
- Investigating a probabilistic formulation for 3D reconstruction from depth camera

AERIAL ROBOTICS LAB | Undergraduate Research Assistant
June 2015 - Jan 2017 | Imperial College London
Built a Walking Hexapod Quadcopter that can both walk and fly
- Demo: `nikonikolov.com/portfolio/wkquad.html`
- Developed Inverse Kinematics walking algorithm in C++ for ARM mbed
- Created a mathematical model and developed simulation using OpenCV
- Developed a library for Dynamixel servo motors and integrated ROS actions

ARM LTD | Hardware Engineering Intern
July 2016 - Sep 2016 | Sheffield, UK
Developed a full-scale transaction logger for a System Memory Management Unit

PROJECTS

THIRD YEAR GROUP PROJECT — Ongoing | Imperial College London
Baxter robot that autonomously delivers snacks indoors
- Working under the supervision of Dr Petar Kormushev
- Work involves ROS, Octomap, Localization, Navigation

DRONE DELIVERY SYSTEM — Ongoing | Providence, RI, US
Raspberry Pi-operated DJI M-100 to deliver food in Brown University
- Demo: `nikonikolov.com/portfolio/dronedelivery.html`

EUROBOT 2017 ROBOTICS COMPETITION — 2017 | Imperial College London
- Built a robot to recognize, collect and deliver objects
- Work involves ROS, Embedded Systems, Localization, State Estimation

HACKZURICH — 2016 | Zurich, Switzerland
Built Android image-processing and OCR based app that can scan grocery receipts to keep track of fridge contents. Used OpenCV and Google OCR API

UK NAO HACKATHON — 2016 | London, UK
Deployed functionality on Pepper robot to recognize an object using Clarifai API and pronounce the name of the object in any language

COURSEWORK
- Raspberry Pi robotic car that autonomously navigates and recognizes objects
- C90 to MIPS compiler implemented in C++
- MIPS CPU and cache emulators implemented in C++
- Real-time image-processing FPGA configuration that tracks human eye movements

ROS FOR SLACKWARE
Open-source contribution to ROS and SlackBuilds.org to enable ROS on Slackware Linux

EUDYPTULA CHALLENGE
Currently Level 4 of the Linux Kernel Eudyptula Challenge

EXTRACURRICULAR ACTIVITIES

Imperial Entrepreneurs - Vice President — 2015-2016
Aikido - 1st Dan Black Belt — 2007 - Present
Startup "mApp it" - Co-founder — 2013 - 2014
Rotaract Club "Varna-Euxinograd" - Treasurer — 2012-2014
